

Principles of Nutrition

Below I have included the key principles that work for nutrition for health and fat loss. If anything you read, see or hear deviates from any of the six principles below, chances are you can dismiss it immediately as a short term fad diet. This is a way of eating that will enable you to achieve both fast and permanent results in a way that is 100% sustainable. You see this change has to be permanent so it has to be both straightforward and above all enjoyable. The good news is that my recipe book will show you how quick, easy and tasty eating this way is.

Follow these principles and you will get results...

1. Eating fewer calories than you burn (calorie deficit)
2. Eat more vegetables and fruits because they are rich in antioxidants and micro-nutrients (vitamins and minerals)
3. Eat plenty of protein for repair and maintenance of lean tissue, and to keep you feeling full (protein satisfies the appetite more than any other macronutrient)
4. Eat enough healthy fats from oily fish, nuts, avocados, coconut and olive oils (healthy fats are an essential part of a balanced diet)
5. Drink plenty of water to naturally detoxify the body, keeping the brain and body hydrated so it can function properly (green and herbal teas count towards this water intake)
6. Limit processed foods and artificial sweeteners and preservatives

Now go and learn, cook, and experience the benefits that my recipes have to offer – enjoy!
